Photographer's Guidelines

For the care of our collections and the historic mansion and grounds, the following guidelines are to be followed during all photographic sessions:

- Only a George Eastman Museum staff member is permitted to handle the collections.
- Photographers assume all responsibility for their equipment and must provide their own electrical power supply, as well as valid insurance liability.
- Rubber tips must be present on all tripods, stands, etc. so as not to damage the marble floors, carpets, flower beds, or lawns.
- All lights must have heat-reflective filters over their fronts. Lights must not be placed any closer than 10 feet when directed at an object.
- Sandbags/stabilizers must be used to prevent mishaps, such as tripping over cords and lights.
- If the wedding party stands on the wood section of the grand staircase, small carpet pieces should be placed on these sections to protect the wood. Carpet pieces are provided by the Eastman Museum.
- No alterations to the premises shall be permitted unless previously approved by museum staff.
